

What is the new joint transport plan?

Known officially as the Local Transport Plan (LTP) 4, this will set out the long-term vision for improving transport and travel across the whole of Dorset over the next 10-15 years. The LTP is a joint initiative for Dorset Council and BCP Council. All councils are legally required to have an LTP, and this plan will replace the existing plan that expires in 2026.

What are we doing?

We're inviting you to share your views, via a survey and at our roadshow events, on what you consider to be the big transport opportunities and issues across the whole of Dorset.

Why your views are important

Your feedback will help us develop a new plan, which will incorporate all we need for a more efficient and sustainable transport network.

It will help us understand the different transport and travel needs of Dorset's varied communities, what needs improving and the travel initiatives that will benefit everyone.

You can complete the survey online or pick up a paper copy at your local library.

What happens next?

Your feedback will help us make decisions together for the future of transport in Dorset.

During the spring, we will analyse all the responses to our survey and provide a report in the summer.

Further public consultation will then take place on a draft plan. This will be considered by both councils before the new joint transport plan goes live in 2025.

This is where **your journey begins...**
